**2<sup>nd</sup> STREET/RIO BRAVO INTERSECTION**

\$534,176 is requested to complete funding for the “2<sup>nd</sup> Street/Rio Bravo Boulevard Intersection” project. The project will reconstruct the intersection with turn lane improvements on 2<sup>nd</sup> Street and Rio Bravo Boulevard, acceleration and deceleration lanes as required on Rio Bravo, lane widening, traffic signalization and lighting improvements and better access to the MRCOG Rail Runner facility and other necessary improvements for pedestrians and vehicles. The project will require land acquisition, environmental compliance, design and construction. Improved movement and alignment of vehicular traffic will reduce the amount of traffic accidents that have occurred at this intersection. The NMDOT has been planning to design and construct this intersection for several years. This intersection is a major hub of traffic for Bernalillo County South Valley and West Mesa traffic that flows from the west side of the County to the more commercial east side of the County. Currently, \$125,000 from a 2013 appropriation (13-1815) is available. The bulk of construction funding will be available in 2018 as this project will receive \$2,000,000 (plus \$340,824 in local match) because it is funded by the MRCOG’s Transportation Improvement Plan
