Bernalillo County, the New Mexico Department of Transportation, and the Federal Highway Administration completed the environmental assessment that addresses extending Sunport Boulevard between I-25 and Broadway Boulevard and improvements to Woodward Road between 2nd Street and Broadway Boulevard.

The public hearing will provide a summary of the environmental assessment and the major findings, and provide an opportunity for the public to comment on the environmental assessment and the proposed action. Comments will be welcomed on bicycle and pedestrian usage as well as preserving natural and cultural resources.

The purpose of this project is to improve roadway connectivity, and address other transportation and access needs in this area. The environmental assessment evaluates the necessity of the project and provides detailed information about major design features, and the impacts to the human and natural environments, and to cultural resources.
