BILL: _____

**SECOND STREET IMPROVEMENTS
(ALAMEDA BOULEVARD TO 4TH Street)**

To provide improvements to Second Street in between Alameda Boulevard and Alameda Road, \$1,600,000 is requested for design and construction. Improvements will consist of widening this existing 2300 linear foot segment of Second Street from 2 lanes to 3 lanes. In addition, curb and gutter, sidewalk, minor storm drainage infrastructure, and a bike trail will be added. All of these proposed improvements are planned to fit within the current Second Street right-of-way.

The improvements between Alameda Boulevard and Alameda Road will be Phase I of three Phases of Second Street Improvements. Phase II will consist of similar improvements from Alameda Road all of the way to 4th Street, and Phase III will consist of widening of Second Street from Paseo del Norte to Alameda Boulevard. All Second Street Improvements from Paseo del Norte to 4th Street will provide a much safer corridor by providing additional capacity for traveling vehicles and a much safer and convenient means of travel for bicyclists and pedestrians. Second Street is an important north-south corridor in Bernalillo County, and it is only one of two streets west of I-25 that provides easy and direct access to the Tramway Road/Roy Avenue road corridor.

Fifty First Legislature, First Session, 2013

AR 2012-103, # 18B
House # 15
Senate #13
Commission # 4

Storm drainage improvements are needed between Alameda Boulevard and Alameda Road since there is currently no storm drainage infrastructure within this roadway segment. Also, with the addition of curb and gutter, there will need to be curb inlets installed to capture the roadway runoff and discharge it into the Alameda Drain which runs adjacent to the west side of Second Street.
