## SUNSET ROAD STORM DRAIN, PHASE 2

\$350,000 is requested for the construction of a storm drain main line in Sunset Road SW. This project reconstructs Sunset Road, SW, from Sunset Gardens to Dennison Road, including storm drainage that utilizes the drainage outfall to be constructed by Bernalillo County's Sunset Gardens, Ph. 2 project. The project will help to remove nuisance ponding and some flood plain which adds to the deterioration of the existing road.

This project is a portion of the area that was previously studied as part of the Sunset-Trujillo Management Plan which was completed in December 2008. The Drainage Management Plan had provided a plan to control drainage in the area and looked at the use of regional ponds, local ditches, storm drain pipe and/or curb and gutter.
